PROSPECTUS ERP ACADEMY

MISSION:

Train ERP professionals by providing value added education. DNS aims to prepare participants for challenging ERP assignments. To make them confident to accept ever-demanding ERP tasks.

**DNS ERP SOFTWARE, PUNE
Learn ERP from ERP experts**

Vision

ERP professionals are in demand; however, there is a shortage of certified ERP professionals. To meet this requirement DNS has taken the initiative to impart professional training. **Knowledge is Strength. Wisdom is Productivity.** In the knowledge-based economy, education is not an expensive luxury, it is the key, which unlocks your potential and opens the door to growth. This is generic ERP training, preparing participant for any kind of ERP package.

**Practical ERP training**

We have designed and developed ERP software known as Digital Nervous System (DNS). For the practical training, this comprehensive package will be used. Our track record in training stretches back to 1980.... Please visit our website **www.dnserp.in** for record of accomplishment of DNS. We have successfully deployed ERP Software in several companies. During the training, there will be seminars / actual demonstration of ERP software in real world environment and activities centered on the theme of 'hands on' applicability of the knowledge imparted. Faculty will be trained ERP professionals. Learn reasons for ERP failures. Discuss strategy for successful ERP implementation. Get trained on Security module to understand login and secret password, access rights and user management.

This course will cover the important fundamentals of ERP, e-Commerce and e-Business systems that are found in today's flat world and how these fundamentals support improved decision-making and processes. This is NOT a programming course. But if you are an ASP.Net or VB programmer, you can learn all about low level programming from our development team and learn ERP database using SQL 2000 Server backend.

About promoters:

DNS ERP Academy is promoted by experienced ERP professionals. Mr. Mohan and the ERP team are the driving force behind this *training initiative*. View track-record and milestones pertaining to Information Technology events on our website **www.dnserp.in**.

Course duration:

300 HRS. – 3 months of intensive training. Fulltime course: Monday to Saturday.
Time: 10:00 a.m. to 6:00 p.m.

Course content

	<u>LEVEL 1</u>	<u>LEVEL 2</u>	<u>LEVEL 3</u>
Duration	100 HRS ~ ONE MONTH	100 HRS ~ ONE MONTH	100 HRS ~ ONE MONTH
Course content Modules / ERP Procedures	Purchase, Bill of Material, Sales, Inventory, Sub-contractor-Out,	Production, Costing, Accounts and Excise Supply Chain Management	Project Assignment on any one module.
Other topics	ERP Concepts, ERP Features, Why ERP, ISO 9000 – QC integration	RFID, Remote login using Internet, BPR, e-Manufacturing, TCO	End-to-end business cycle. CRP Run (Conference Room Pilot)
Fees	Rs. 45,000/-	For the full course	

☛ We will help successful participant in getting a suitable job. We ourselves need ERP professionals to strengthen our DNS team.

Project work

Participant will be required to work on an ERP project. In the third month participant will focus on one of the ERP modules. For instance, if you have accounting background you may like to focus on 'Accounts' module or if you have Sales background you may focus on 'Order Fulfillment' module, and so on. If you are an IT professional, you would like to work with our ERP development team in the third month. The Project Report must be based upon the first hand study of one of the modules of any organization.

Inspiration

We draw inspiration from people like Bill Gates. Our name '**Digital Nervous System**' is taken from his book 'Business at the Speed of Thought'.

Management Guru late Mr. Peter Drucker was asked: "What is the most important impact of Information Technology on business?" He replied: "Information technology forces you to organize your processes more logically. The computer can handle only things to which the answer is 'YES' or 'NO'. It cannot handle MAYBE. It is not the computerization that is important; it is the discipline that it brings to your business processes."

"In the coming years, companies will either be e-business or no business." Said Mr. Andy Grove, past CEO of Intel. The first step towards e-business is ERP.

Certificate

The 'ERP Professional' Certification will be added advantage for you to accelerate your career in this ever-competitive business world. (It is necessary to complete 300 hours training).

Track-record:

We Build ERP Careers @ DNS

In the past many young participants have joined us to learn ERP. ERP Academy is for proper ERP training, to good placed jobs, for the right participant. First-rate faculties, with vast industry expertise. Intensive ERP training is given to toughen up participants.

Testimony from past participants who received hands-on ERP training, and this is what they say about us:

"I am working with TRF (TATA Robins Freaser) in Jamshedpur. I will never forget the learning had taken at DNS. I will never forget those days of learning, while I was working in DNS during summer training while doing my MBA".

- Mr. Virendra Singh Ranawat

First of all; I would like to thank DNS for giving me very good platform right at the start of my professional career. I was working in production department in a large automotive company. I came to DNS with my Engineering background with no previous ERP knowledge; by the end of my span at DNS; I had become a skilled ERP professional.

I got the exposure to wide variety of business verticals in DNS which helped me to gain knowledge of many diverse industry verticals. I owe a big part of my career success to DNS; I would highly encourage any individual contemplating to enter in to the ERP world to choose DNS as an option".

- Mr. Mayur Patil (currently in USA)

"I was very raw person in terms of Professionalism as well as knowledge of ERP before joining DNS. But I was excited and keen about learning the ERP domain. DNS not only taught me ERP in a simplified way but directed me in my entire career as my mentor. He converted me from a very raw person in to an ERP Consultant.

Because of knowledge shared by him in DNS ERP, I got various opportunities to work on ERP Products like SAP, JD Edwards as well as Project Management tools like MS Project Server and SharePoint Server with reputed Organizations like Tata and BEST and to travel across India and USA".

- Mr. Kedar Joshi (Currently in USA).

"Before joining DNS, I was working in a joint Venture company. I had only knowledge about Sales cycle.

But after joining DNS, I was able to learn complete functionality of how a company runs, how an ERP helps management people to take decision.

Because of this experience I got a job at Schrader an MNC.

- Mr. Dhiraj Purusha

ERP TRAINING FAQ

Q. Is this SAP training?

A. This is general ERP training. Enterprise Resource Planning (ERP) is a generic name and SAP, Germany offers ERP software solutions. Hence this is not pertaining to 'SAP' training. However, after this comprehensive training, participant can learn any specific company's package easily. It is like learning to drive a car and once you have learnt driving, you can drive a Maruti car or a Mercedes Benz.

Q. Is it possible to load ERP package on my notebook PC.

A. Yes, if you join all three levels, we will deploy DNS ERP software (Demo version), on your laptop. (Min. 1 GB RAM required). Thus, you can enter your own data, e.g. prepare a BOM and practice to gain confidence. You do not have to buy DNS ERP to learn the package.

Q. Do you offer part-time work to people after ERP training?

A. We offer full-time work to a participant who completes all three levels successfully. ERP is a very serious business and cannot be a by-the-way, part-time work.

Q. After doing three months ERP training on DNS ERP package, can I work on Oracle or JD Edward or any other MNC package?

A. We are teaching all the modules of ERP with various complex scenarios. Usually, in case of MNC ERP you will work only on one (or two) module. Once you master the concept of ERP you will be able to learn another package easily.

Q. What are the benefits to participant of this DNS ERP Academy?

A. Participant will gain an understanding of how technology can facilitate integrated business processes and strategic thinking which will improve their chances of employment.

ERP SYLLABUS
