# BENEFITS OF ERP

➢ To say in short, *DNS* **ERP** systems integrate all business management functions, including planning, inventory/materials management, engineering, order processing, manufacturing, purchasing, accounting and finance, human resources, and more.

➢ India's leading web-based ERP solution provider *DNS* **ERP** even offers mobile capabilities so that you can always have a finger on the pulse of your business activities.

➢ The biggest advantage of an ERP system is with its real time capabilities and the ability to see what is going on with your company as it happens. It is handy when you deal with high volume of business process. With an ERP system, your company will never have inventory shortages or wasted time spent transferring files.

An ERP system provides the solid operational backbone. The system enables the Manufacturer to function promptly, which will enable you to improve the volume of production and fulfillment of orders while reducing costs. By optimizing manufacturing and distribution operations with ERP, you are also able to focus on new business opportunities

Here is a quick look at the benefits the *DNS* **ERP** system has to offer :-

- Streamlining processes and workflows with a single integrated system.
- Reduce redundant data entry and processes and on the other hand it shares information across various Departments.
- Establish uniform processes that are based on recognized best business practices
- Improved workflow and efficiency
- Improved customer satisfaction based on improved on-time delivery, increased quality, shortened delivery times
- Reduced inventory costs resulting from better planning, tracking and forecasting of requirements
- Turn collections faster based on better visibility into accounts and fewer billing and/or delivery errors
- Decrease in vendor pricing by taking better advantage of quantity breaks and tracking vendor performance
- Track actual costs of activities and perform activity based costing
- Provide a consolidated picture of sales, inventory and receivables

- *DNS ERP* offers the functionality you need to increase efficiency across your enterprise.

- Managing organized and streamlined business process - purchase, sales, Inventory, billing, production, receipt, payment, HR, Taxation, Excise and Exports.
- Keeping day-to-day track of sales, dispatches & payments
- Calculating accurate production costing and a more scientific manner.
- Accessing consolidation financial information
- Accessing daily report without depending on anyone.
- Timely Delivery and reducing inventory yet maintaining production cost.
- Maintaining best practices and introducing Industry best practices
- Ensuring that everyone in the organization is responsible and accountable

Some of the main features of the *DNS* **ERP** Software

- ➢ 100% accuracy of Data. As all the department documents are tightly linked with Organization Logic in place, there is no way that user can make mistakes rather system will not allow to enter erroneous data. Hence you can rely on data to take financial decisions without much ado.
- ➢ Reduction in duplicacy of data entry. Most of the entries are posted by *DNS* System automatically. Eg. When user enters material receipt, system automatically posts 3 entries viz. (i) Stock is updated; (ii) Vendor Payable ledger is posted and (iii) Tax Payable accounts are posted. These would have otherwise required 3 different entries to be entered into the system which invariably results in reducing costly Human resources for mundane activities.
- ➢ Important Documents defined by Management cannot be passed until and unless approved by Authorised Person. This is helpful to ensure that vital Documents are not sent out without auditing.
- ➢ Just-In-Time (JIT) Management of Inventory : Will ensure that your capital is not stuck up unnecessarily in buying excess Inventory.
- ➢ Physical presence of Management not required in Office to Manage Approve/or get MIS reports. You can access all Data while your are on the move. You can quote Rate instantly in front

of your customer as you have got real time data and costing with best competitive rate, giving you that extra edge vis-a-vis your competitors.

➤ Management can get vital MIS reports like Overall performance of Sales compared with previous years, projections, Pending Projects, estimated date of completion, Budgeted vs actual expenses extra within 60 Seconds.

➤ Better Customer relationship Management.- As the planning of Orders is done scientifically, you will be able to deliver as committed.

➤ Security of Data is maintained by providing appropriate access rights

➤ *You can expect a return on investment of 10-15% within the 1st year of use itself, in terms of reduced Inventories, reduced Lead Times, better Project Execution and Order fulfillment leading to better CRM, Cost reductions and better productivity, plus a host of intangible benefits such as customer & employee satisfaction, improved response time, etc.*

➤ *In addition to the above you also enjoy a 30% depreciation on the software*.

➤ Overall, you should get return on your investment in the very first full year of Going Live.
